- ◆ Death Benefits

Well-Child Exam

An annual physical exam (head to toe) is important for the health of a child. **Sick visits** are not a complete exam. During a well-child visit unknown health problem are more likely to be identified allowing early intervention for the child.

Dental

A dental exam should be done at least once every year. This is essential to maintaining good dental health for a child. The cleaning and fluoride treatments that dentists provide are very beneficial for prevention of cavities. Furthermore, if there are any new cavities, the dentist can treat them early before the cavities become a problem.
